

PBImport Following Sage 50 Upgrade

PBImport version 9.9 and above is compatible with Sage 50 V26, V26.1 and V26.2.

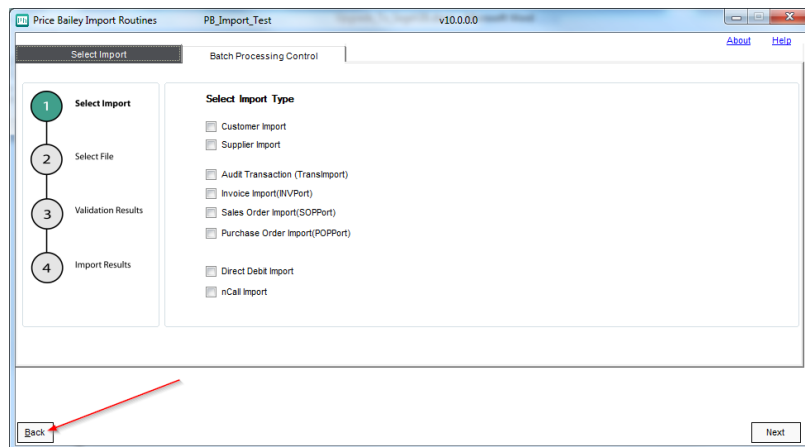

Open Price Bailey Import Routines and check the version number at the top of the screen:-

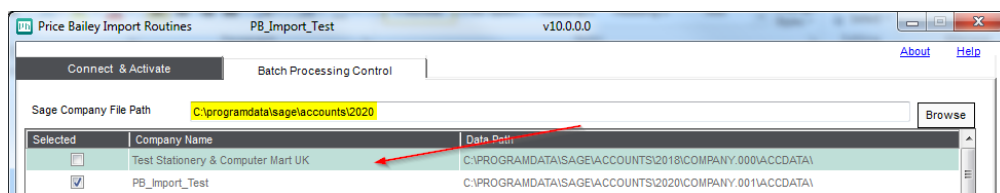

If the version number is not v9.9 or above, you need to install the latest version of PBImport. To do this see - [Installing PBImport](#)

If the version is V9.9 or above, you need to link PBImport to the new Sage 50 File Path.

Open Price Bailey Import Routine. Click <Back>:-

Navigate to the Sage Company File Path. Once this is selected you will see your Sage 50 Companies:-

Select the companies as required and then you can use PBImports with your new Sage 50 version.

Installing PBImport

We have a link on our web site to download the software.

<https://www.pricebailey.co.uk/services/business-software/tailored-services/>

There is also an Installation Guide that will talk you through installing and setting the software up. Once installed you will need to email the licence ID through to support@pricebailey.co.uk
