

Practical advice for dental practices

Let us manage the numbers, compliance
and strategy, so you can focus on delivering
the best dental care to your patients.

The right advice for life

Why choose Price Bailey?

Running a dental practice today means juggling far more than patient care. Increasing regulatory scrutiny, complex tax rules, staffing challenges and rising operational costs all put pressure on your time and resources.

Our healthcare specialists are here to help you navigate these challenges with confidence.

Dental practices across the UK trust us to deliver:

- Partner-led guidance through regulatory changes and compliance
- Tailored financial and business advice
- Strategic planning for profitability, growth and succession
- Outsourced accounting, payroll and VAT solutions to save time and reduce errors
- Proactive, personalised support from experts who understand your sector

“Day in, day out, Kirsty Beck and her team act like an extension of our own management group—producing clear, timely management information, handling payroll and bookkeeping with zero drama, and proactively highlighting ways to protect margin as we invest in digital scanning, clear-aligner therapy, 3-D printing, guided implant surgery and other leading-edge technologies. Their responsiveness frees my clinical team to focus on patients and postgraduate teaching while knowing the numbers are under control!”

- Systems expertise to support the design or streamlining of accounting processes
- Payroll, pension compliance and management of payrolled benefits

“At the strategic level, Holly Gibson, Partner, has been instrumental in safeguarding the long-term financial health of the practice. Her talent for structuring tax-efficient profit extraction, succession planning and practice-expansion funding—combined with her deep network across specialist healthcare lenders—means we always have the right capital in place to pursue our vision. Holly keeps us looking beyond the next quarter toward sustainable growth and resilience.”
